

Autobank® CX Series

CXMS2513

Increase operational flexibility and security by reducing cash exposure

- Dual drop-slots and compartments separate access to bill validators, manual drops and change funds
- Provisional credit-enabled by closed-loop cash management

CXM safes provide accurate, high volume note processing. The dual doors allow separate, unique access rights to primary and secondary funds. The top bill validators are secured in a separate compartment for management or transport access, with the lower compartment with manual drop available for store operations. All of these features are designed to provide retailer's the ability to maximize cash flow and reduce cash shrinkage.
