

BSD Series

Intelligent Manual Drop Safe

Easy to use, highly secure cash management solution

- Drop drawer allows direct deposit to inner compartment
- Burglary deterrent construction
- Time delay lock feature as robbery deterrent
- Three permission levels with positive identification limits access by role
- Detail support of accountability audits with 10,000 lines of transaction history

Designed for secure cash storage and access control, the BSD is an excellent device for retail businesses that handle significant amounts of cash, store tills and other valuable assets. These NKL models feature an interior compartment with manual drop drawer, 5-point premium NKL bolt-work hardware, automatic locking detent mechanism, and burglary resistant lock with relocker. Electronics feature positive user identification with electronic key (keyless access option available), audit trail, and programmable delay and timelock settings. Optional internal coin racks available.

*Assuming a standard till size of 2.5"H x 15.5"W x 11.25"D

BSD4125

Exterior Dimensions: 41"H x 25"W x 26"D
Weight: 500 lbs
Holds up to 16 Standard Tills*

Features Available on the BSD

TECHNOLOGY FEATURES

Positive User Identification

Dual access accountability with both a user number or electronic key and a personal identification number (PIN) provides a redundant identity check.

Encrypted Audit Trail

The audit trail provides the ability to review all safe transactions. The memory will retain up to 10,000 events. Audit data may be viewed or printed.

Multiple Levels of Authority

To give each employee the controlled access you determine.

Multiple Languages Platform

Printer Interface

The safe's printer port gives you the ability to print the audit report on any standard serial printer.

Time Lock & Time Delay

The Time Lock feature allows you to set the time of day or night when the safe can be opened, and the Time Delay the length of delay between an authorize key entry and when access is permitted. When the employee enters a key and PIN the Safe displays "Time Delay" and a clock starts counting.

Day-Lock Prevention

The safe can be programmed to alarm, and event logged, if the door is left open for a set period of time.

Armor Car Override (ACO)

If you use an Armored Car service, an ACO key is available to bypass the Time Delay and Time Lock restrictions.

Duress Alarm

The safe can be integrated into your existing alarm system so in the event of a robbery, the operator has the ability to activate a duress alarm should they choose.

Non-Volatile (FLASH) Memory

In the event the power goes out, the system retains all of its settings and the entire audit history.

STRUCTURAL FEATURES

- B-rate construction
- 5-point premium NKL bolt-work hardware
- Auto door detent
- Spring-loaded re-locker
- Adjustable, ball bearing hinges for easier open/close of door

CUSTOMER CARE AND INSTALLATION SERVICES

In retail operations, uninterrupted cash flow is required for a healthy business. We understand this so our service representatives are available 24/7/365 and our fleet of company owned service vehicles are ready to respond to your needs. Cennox has the infrastructure, scale and experience to deliver outstanding safe service for retailers of any size. We provide a single point of contact for all your service needs and will always be there when you need us with a quality experience, proven delivery process and consistent results. Installation services include rollout planning and program management, delivery, installation and training. Support has never been more personable, effective or efficient.
