- Can buy change or dispense on credit
- Secure access by User Number, Pin, iButton or Biometrics standard
- Real time help menu with printable screens
- Web-based reporting
- Complete remote management suite
- Plug and play installation
- State-of-the-art encryption for secure communications

The Summit coin dispensing units can be linked with bill validating safes to meet all your cash management needs. It is the industries only automated dispensing unit that tracks coin inbound and outbound. This network solution not only brings the latest technology to day-to-day cash processing at your retail locations, but also leverages our Summit Web Services to make daily cash handling information available to your entire organization. With immediate view of cash activities across single or multiple locations, the ability to maximize cash flow and reduce cash shrinkage is greatly enhanced.

TO MOVE AHEAD

Please call **(800) 342-3033 ext. 3001** to speak with a representative to learn more about how the Summit Series can take your cash management to the next level.

SUMMIT
SERIES

Features

- Cloud-based suite of BI capabilities for data mining and remote management.

- Security between the safe and the cloud servers provided through state-of-the-art encrypted VPN channel using certificate based authentication.

Intuitive, easy-to-use touch pad interface increases staff productivity, while reducing training time and costs

SUMMIT SERIES DEVICES CAN BE NETWORKED UTILIZING YOUR EXISTING COMMUNICATIONS INFRASTRUCTURE TO ENABLE CASH TRANSACTION DATA EXCHANGE, REMOTE ACCESS MANAGEMENT, AND BROADCAST ALERTS.

- Plug and play capability with no system or network configuration required. Simply plug in the power and network cables and the system draws down its configuration, reducing deployment and maintenance time and effort.

- Remote monitoring of device and component health with email alerts enabling preventative and predictive maintenance.

- Remote system access from any PC, laptop, tablet or smart phone device through web-based reporting provides visibility anytime, anywhere to cash handling activity and positions.

- Remote user management, enabling addition, deletion or modification of any users remotely.

- Detailed transaction reporting by user, day or shift with consolidated reporting across multiple locations provides visibility of cash handling activities.

- Unlimited number of users with the ability to store over 100,000 transactions to support discrepancy analysis.

- Built-in user guide providing real-time access to help menu with step-by-step instructions.

Deposit and dispensing devices with compartments that can be bolted on to the main unit to configure a solution to meet your storage, access and counter height requirements.
